<https://github.com/reinaldoagf>

Hello, I am a **computer engineer** and a passionate **software developer** with a solid **experience of 6 years** in the field of **web development**. My approach extends to both the **frontend** and **backend**, where I have worked on creating **attractive and functional user interfaces**. My motivation lies in **solving challenges** and **constantly seeking improvements**. I am committed to delivering **high-quality** solutions in all aspects of **software development**.

EDUCATION

- **UNIVERSIDAD NACIONAL EXPERIMENTAL DE GUAYANA**, Ingeniería Informática
- **SELF-DIDACTA**, Online education platforms: Platzi. (Certified courses)

SUMMARY OF SKILLS

- Programming Languages: **HTML5, CSS3, JavaScript, Typescript (ES6+)** (6 years of experience)
- Frameworks: **Angular, React** (5 years and 3 years of experience respectively)
- **Responsive Design** and **Mobile Adaptation** (5 years of experience)
- Web Performance **Optimization** (5 years of experience)
- **Unit Testing** and **Performance Testing** (5 years of experience)
- Version Control: Git (6 years of experience)
- Web Development Tools: **Visual Studio Code, Webpack, Figma**
- Experience in Design Integration and Interdisciplinary Collaboration.

LANGUAGES

- **Native** Spanish
- Inglés **A1**

INTERESTS

- Web development and technology
- Continuous learning
- UI Design
- Problem resolution

PROYECTOS DESTACADOS

- **Checklist Project** (Most Recent) Description: Development of a web application for monitoring physical stores in real time using **websockets** technology. This app was developed with **Next.js**, taking advantage of its server-side rendering approach for fast page loading and smooth user experience.
- **Burbel Flight Project** Description: Key contribution in the development of a web application using **Angular 8**. This application focuses on resource management and control of skydiving jumps. Implemented the **Lazy Loading Pattern** to **optimize the performance of the application**, guaranteeing an efficient experience for users.

WORK EXPERIENCE

Grupo hostienda (feb. 2018 - may. 2018)

Development Department Web developer

- I gained experience in developing user interfaces using HTML, CSS and JavaScript.
- I contributed to the team in adapting designs to different devices and browsers.
- Participated in solving technical problems and improving code efficiency.
- Collaborated closely with senior developers and learned web development best practices.
- I collaborated with the development team to create the RESTful API using technologies such as Node.js and Express. This includes creating routes, managing requests and responses, and handling data on the server.
- I collaborated with the development team to implement authentication and authorization systems to guarantee the security of the applications with JWT (JSON Web Tokens).

Bioonix (jul. 2019 - dec. 2019)

Development Department Web developer

- I collaborated in the development of high-quality websites using Angular, meeting industry standards.
- Led performance optimization initiatives, improving loading speed and user experience.
- Participated in design integration and effective collaboration with design and development teams.
- Performed unit testing and performance testing to ensure code stability and quality.
- Contributed to the success of key projects, resulting in customer satisfaction and business growth.

Freelancer (nov. 2019 - jul. 2022)

Web developer

- Development of an intuitive and friendly user interface for a customer management application.
- Implementation of advanced search and filter features to facilitate data navigation.

Devups (ago. 2022 - current)

Development Department Web developer

- Design and development of a web platform that allowed customers to track their orders in real time.
- Integration of email and SMS notifications to keep users informed.
- Performance optimization to maintain loading speed and efficiency.
- Close collaboration with the design team to ensure visual consistency.
- I collaborated with the backend development team that enabled customers to track their orders in real time. This involves creating services and endpoints that handle tracking data and provide up-to-date information to clients.
